

## Embedding a Kanopy video into Canvas

1. Find the video on Kanopy that you wish to embed in Canvas.
2. Once you find your video, click the Share icon and then the Embed link (see image below).

3. Note the number that is associated with the video. In this case the number is 541104.
4. Within the section of Canvas that you wish to embed the video, use the following link to direct students to watch the Kanopy video, replacing the video number at the appropriate place in the link:  
<https://login.ezproxy.lib.ou.edu/login?url=https://ou.kanopystreaming.com/embed/541104>
5. Using this link, students who are off campus will still be able to view the video as it forces them through the proxy server where they can authenticate themselves as an OU student by logging in with their 4x4.
